Docket No. AUS920010010US1

ABSTRACT OF THE DISCLOSURE

METHOD AND APPARATUS FOR GENERATING GAMMA CORRECTED ANTIALIASED LINES

5

A method, apparatus, and computer implemented instructions for generating antialiased lines for display in a data processing system. Graphics data is received for display, wherein the graphics data includes

10 primitives defining lines. A gamma correction is applied to the graphics data on a per primitive basis to form antialiased lines. The antialiased lines are displayed.
